the study trawled the seabeds of the five areas for litter at a total of 94 sampling stations in early 2013

they may range from 80,000 to 140,000 (about 54,000 – 95,000) or more per annum, but the higher paying jobs may require relocation, a busy work environment and long hours.

he strapped the bale to his back and stood on the bathroom scale, did some quick math: the coke weighed seventy pounds
